

SABRE SAFETY LTD DATA SHEET

OCEANUS, the Power Pack for Professional Use, 140 l/min

For a professional performance, which offers toughness, mobility and greater air capacity!

OCEANUS is designed to go on vessels, diving boats and expeditions.

The light weight and compact unit is portable by a single person and fits in every boot.

The use of stainless steel and kevlar for frame and filling device ensures extreme resistance to corrosion.

Durable and Extremely Tough

For best possible resistance to corrosion frame, handle and safety-filling device are made of **stainless steel**. Filling hose is made of **kevlar**. Inter- and after coolers are made of **galvanized steel**.
