

SABRE SAFETY LTD DATA SHEET

Crowcon Detective

The Detective transportable monitor units can be used singly or linked together to give effective area protection simply and quickly. Linked Detectives will give an audible alarm when there is a gas hazard, but will only flash slowly until the hazard reaches them. This ensures personnel know which is the safest route to exit the area. The Detective is based on the highly successful Triple Plus multi-gas monitor, which has sold over 40,000 units world-wide.

Features:

- Wailing omni-directional siren, 101 dBA @1m
- High intensity LED clusters with panel indicator to pinpoint source of hazard
- Linked Detectives flash in alarm
- Audible & visible confidence blip
- Uniquely rugged, tripod construction
- Fully protected, even if overturned, with raised detectors to prevent water ingress
- Easy to set up with light stackable design for easy transportation
- Large four gas, simultaneous text display

Wide range of intelligent, interchangeable sensors available
