

SABRE SAFETY LTD DATA SHEET

Rig Rat II

The multi-point stainless steel RIG RAT II is state-of-the-art in gas detection. With independent wireless radio signal transmission, the self powered. Solar capable system provides the ultimate flexibility and versatility.

RIG RAT II is totally modular in design with plug-in ports for all system components and field interfaces: remote sensors, remote alarms, relays, solar power, etc.

Microprocessor based operation and forefront sensor technology assures reliability and performance

- Gas Monitored: Combustibles (0-100% LEL) H₂S, O₂ and 12 other toxic gases
- Independent Power.
- Wireless Radio signal transmission.
- Modular design plug in ports except all interfaces
