

TRAINING COURSE

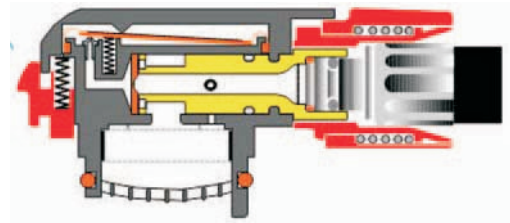

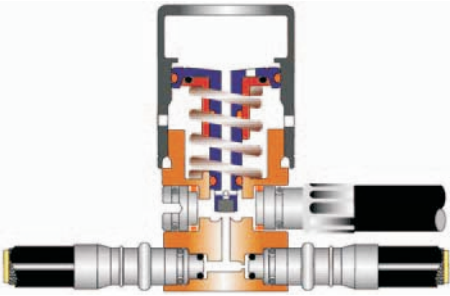

Sabre B.A. Service & Maintenance

This course is designed to provide the participant with the knowledge, skills and appropriate attitudes for him/her to have confidence in carrying out the full service and maintenance of a specified Sabre breathing apparatus set.

Course topics and activities include:

- Introduction.
- Pre-use inspection & donning.
- Harness maintenance.
- Face mask maintenance.
- Pneumatics maintenance.
- Cleaning and storage.
- Fault finding.
- Practical assessments.

Delivery consists of classroom theory and practical exercises. This allows for total integration of competence, knowledge, thinking skills, and correct procedures.
