

DATA SHEET

Sabre Contour

An ergonomically designed, self-contained breathing apparatus which is lightweight and allows for unrestricted operational movement.

Newly designed, injection moulded, composite back-plate ensures optimal load distribution and balance.

Designed for use with either the new Vision 3 or standard PanaSeal facemask.

Harness fabricated from flame retardant materials.

Automatic positive pressure demand valve features low breathing resistance, and unsurpassed dynamic performances; particularly at high flow rates.

Available in either single or dual cylinder configuration.

Conforms to BS EN 137 & 139.
